

I am a subscriber to xm satellite radio and have been for a long time. I do not think that the NAB should have the right to tell satellite radio what they can and cannot broadcast. XM satellite radio provides me with quality of signal and variety of content that regular broadcast stations don't offer. That is why I am happy to pay for this service. I really don't think that it is right for the National Association of Broadcasters to be able to tell me what I am permitted to hear.

I respectfully urge the you the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand, deserve, and PAY for.
